

To whom it may concern:

Please reject the NAB petition #04-160 with regard to its attempt to preclude satellite radio from offering traffiic and weather.

As a salesman, I often travel away from home and having these reports available to me as I am away from locally listening areas is invaluable to me as an assit to my travel plans.

Please spend your efforts on more important things than this trivial attempt to stop competition on the airways.

Thank you for your consideration
